Overview
New for Pediatrics, the SBIRT Screen will be required documentation at Admission for nursing, and will be found in the Admission navigator. If a patient answers anything other than Never on any of the first three questions (Tobacco?, Alcohol?, or Marijuana?), 4 additional questions will cascade for the patient to answer as well. When those questions are answered, and the section is closed, a BPA will fire prompting the nurse to order a Social Work Consult.

What does it look like?
