DIRECTIONS

The worksheets on pages 2 and 3, to be used as a pre-test and a post-test, will assess student knowledge gained by this curriculum. Please distribute the worksheet labeled PRE-test to your students so they can complete it and return it to you before the education session. After completion of the head and neck cancer curriculum, please distribute the worksheet labeled POST-test to your students for completion, collection, and grading.

The worksheet on page 4 is to be completed during the education session. The column on the left should be completed by the students during class. The column on the right is open for students to note important facts or ideas they learn. At the end of the session, please collect and grade the worksheet and then return back to the students for their review.

The worksheet on page 5 should be distributed after completion of the education session and used to facilitate a class discussion.

PRE-TEST

Name: _____ Grade: _____ Date: _____

Please circle the correct answer.

1. HPV is a virus that can be spread from person to person. True False
2. HPV infection is rare in the United States. True False
