PURPOSE

To provide nurses and care providers with a review and update of psychotropic medications commonly used in the care of adults, for the purpose of promoting an informed and effective level of care for patients.

WHO SHOULD ATTEND

Providers who prescribe or administer psychotropics or providers who work with clients who are receiving psychotropics.

- Nurse Practitioners
- Physicians
- Registered Nurses who work in primary or acute care
- Social Workers
- Case Managers
- Psychologists
- Occupational Therapists

Note: In order to receive contact hours, participants must attend the entire session and complete an evaluation.

FACULTY

Jana Sobczak, PhD, PMHNP-BC, PMHCNS-BC

*Associate Professor and Coordinator
Family Psychiatric Mental Health Nurse
Practitioner Program
SUNY Upstate Medical University
College of Nursing, Syracuse, New York*

Dr. Sobczak obtained her BSN from Fitchburg State College in Fitchburg, MA, her MSN in Psychiatric Mental Health Nursing from the University of Virginia in Charlottesville, her PhD from the Medical College of Georgia, a post doctoral fellowship at the University of Washington's Department of Psychosocial and Community Health Nursing, and a Post Master's Certificate as a Psychiatric Mental Health Nurse Practitioner at SUNY Stonybrook. She is ANCC certified as a Family Psychiatric Mental Health NP as well as an Adult Psychiatric Mental Health CNS. In addition to coordinating the Family Psychiatric Mental Health Nurse Practitioner Program at Upstate Medical University College of Nursing, Dr. Sobczak maintains a private practice in North Syracuse.

Declaration of Vested Interests: None

COURSE OBJECTIVES

Following this program the participant will be able to:

1. Correlate neuroanatomy and neurophysiology with psychopharmacology and psychotropic drugs.
2. Discuss the general principles of prescribing psychotropic medications to pediatric clients, including related ethical and legal issues.
3. Describe indications, targeted effects, drug interactions, side effects and potential adverse effects of common psychotropics, including:
 - Antipsychotics
 - Antidepressants
 - Mood stabilizing agents
 - Anxiolytics
 - Cognitive enhancers
4. Explain current protocols for the treatment of common mental health conditions such as mood disorders, anxiety disorders and disorders of impulse control.

COURSE ACCREDITATION
