MLC I: Case Studies for Integration of Basic and Clinical Science (MPPH 101) is the first part of a two-year sequence in the basic science curriculum whose essence is the reading of a series of cases from the medical literature. Cases will be chosen to represent diagnostic reasoning involving a wide spectrum of clinical problems. The experience will provide models of high-level clinical reasoning, with the goal to make students conversant in the language of medicine and to provide a conceptual and experiential framework for students’ education and future training.

Separate from the case-based learning component will be a series of readings and discussions introducing the biology of disease (“general pathology”), highlighting topics such as cell injury, inflammation, wound healing, infection and immunity. Most of the readings for this will come from the Rubin’s Pathology text (see below) or assigned papers.

Class sessions will be held on select Tuesdays mornings and Thursday afternoons throughout the academic year. Please see the official curriculum calendar and/or the course web site for dates. The schedule for the first unit/month of the year is posted.

The first session of the course will be held on Tuesday, August 13, 2013 at 11 a.m.

Two books will be utilized extensively in MLC I for the 2013-2014 academic year:
1) Rubin's Pathology: Clinicopathologic Foundations of Medicine (e-book through library)
2) Lippincott's Illustrated Q&A Review of Rubin's Pathology (e-book through library)

Assigned readings from the Rubin’s text will occur early in the course so stay tuned for announcements within Blackboard. These texts will also be used again next year in the second-year pathology course. In addition to the required texts, several resources will be recommended to you, most of which are available at no cost to you through the library’s web site when you arrive on campus.

You will also be required to purchase an audience response system (“clicker”) for the course before the first class session (a demonstration of how it works will occur during MS1 orientation on the afternoon of August 8th). Instructions for buying and registering your clicker are attached. Clickers will be used in some of your other courses as well.

Please feel free throughout the summer to browse both the program web site and the Blackboard site, which will serve as your “home base” for the course for scheduling, policies, assignments and the like.

We congratulate you on your entrance into this profession and wish you success. Please feel free to contact us with any questions at kellykc@upstate.edu.
Clickers for Use in MS1 Curriculum for 2013-2014

Step 1: How to Purchase
Step 2: How to Register Your Clicker in Blackboard

Clickers will be used for assessment, attendance and general participation in multiple MS1 courses beginning on Tuesday, August 13th, so please purchase your clicker ahead of time, either online (starting on July 23rd) or in person when you arrive on campus.

1. How to Purchase Clickers Through the School Bookstore Online

www.upstate.bkstr.com

- Select Books, then Textbooks and Course Materials
- Select Term as Fall 2013
- Select Division as CM (College of Medicine)
- Select Department as MPPH
- Select Course as 101 (MS1 Year)
Clicker will show up as “ResponseCard RF (RCRF-03)(ID:57FAOB) Edition: N/A”

Course Materials

CM: MPPH: 101: 001: Paul Shanley

4 Required Material(s)

Print List

Required Material(s) (4)

ResponseCard RF (RCRF-03)(ID:57FAOB) Edition: N/A

Price is $43.50. It will be available online as of July 23, 2013.

2. How to Register Your Clicker to Your Student Account in Blackboard

- Log into the MLC-2 Blackboard course
- Select “Clicker Registration” from the menu at left
- Select “Clicker Registration Tool”
- You will see a place to “Register ResponseCard”
- Enter the Device ID code on the back of the clicker (typically 6 characters, combination of letters and numbers)
Turning Technologies Device Registration

To receive credit for your participation in-class, register your Turning Technologies device.

**ResponseCard**
Handheld clicker device

**ResponseWare**
Web enabled response system
