

59th Annual Post-Graduate Review Course: Ophthalmology

Program Description

The 59th Annual Post-Graduate Review Course: Ophthalmology is specifically designed for the practicing ophthalmologist and technical staff. The program consists of a series of didactic lectures with visual aids and supplemental educational materials. Ample time will be available for participants to interact with both guests and local faculty.

Learning Objectives

Upon completion of this activity, participants should be better able to

- evaluate and manage the patient with ocular disease
- explain diagnostic and treatment options for ocular diseases and conditions
- assess current issues, trends, and research findings
- incorporate new technologies into your daily practice
