

Management Guidelines for Minor Head Trauma (TBI) 0-2 years old

Refer to the Moderate & Severe TBI protocol for patients to be admitted to the PICU

- ***A major mechanism includes:
1. Falling from a motorized vehicle
 2. MVC with occupant death/pt ejection/roll over
 3. Falling from a height of more than 3 feet
 4. Un-witnessed head injury with major mechanism
 5. Suspected abuse or if history is inconsistent

If suspicion of child abuse follow NAT order set and guidelines

*** Signs of a Basilar skull Fracture include:**

1. Raccoon eyes
2. Post ear hematoma
3. Blood or CSF in ear
