The SUNY Upstate Medical University College of Graduate Studies is offering fellowships for its 2018 Summer Research Fellowship Program.

The program will be held from Monday, June 4 through Friday, August 10, 2018. Students accepted to the program will carry out research under the supervision of an established biomedical scientist, write a research paper and have the opportunity to see their work published.

Each fellow will be provided a \$3,000 stipend for the 10-week period plus free housing. The SUNY Upstate campus is on the dynamic "University Hill" in Syracuse, New York.

The program is competitive. Applicants should be undergraduate students in good academic standing, who will have completed their junior year of study, and are majors in chemistry, biology, or a related field. International students who currently have a J-1 or F-1 visa and who are already attending school in the United States are eligible to apply. Applicants must have a strong interest in pursuing a career in basic biomedical research.

The main criteria for the selection of fellows will be personal scholarship and academic excellence and the match of applicant interests with those of participating SUNY Upstate researchers.

**Deadline for Applications:
February 16, 2018**

In addition to the completed online application and personal statement, please submit the following documentation:

- An official transcript of your undergraduate study to date.
- Two letters of recommendation. These may be requested from professors related to your major, an advisor, and/or department chair.

Applicants can apply online:
