

Practice Based Learning PICO Presentations

I. Goal

For residents to practice searching medical databases for relevant answers to clinical questions that come up in morning report

II. Objectives

- A. To appreciate the difference between background knowledge and foreground information.
- B. To learn the process of formulating appropriate PICO question for searching medical databases
- C. Document textbook solutions
- D. Document resident or local practice solutions that the resident thinks are most likely to be the practice they would see on the wards
- E. Search medical databases and document their search strategy
- F. Summarize pertinent articles
- G. Define conclusions and quality of data discovered
- H. Post formatted "PICO document" on Intranet

III. The Project

- A. Resident prepares above and presents summary in 10 minutes on last Monday of every ward rotation in morning report

IV. Evaluation

- A. Chief resident and PD give written feedback on project
- B. PICO questions catalogued in resident file under Practice Based Learning
