

MORNING CMO REPORT

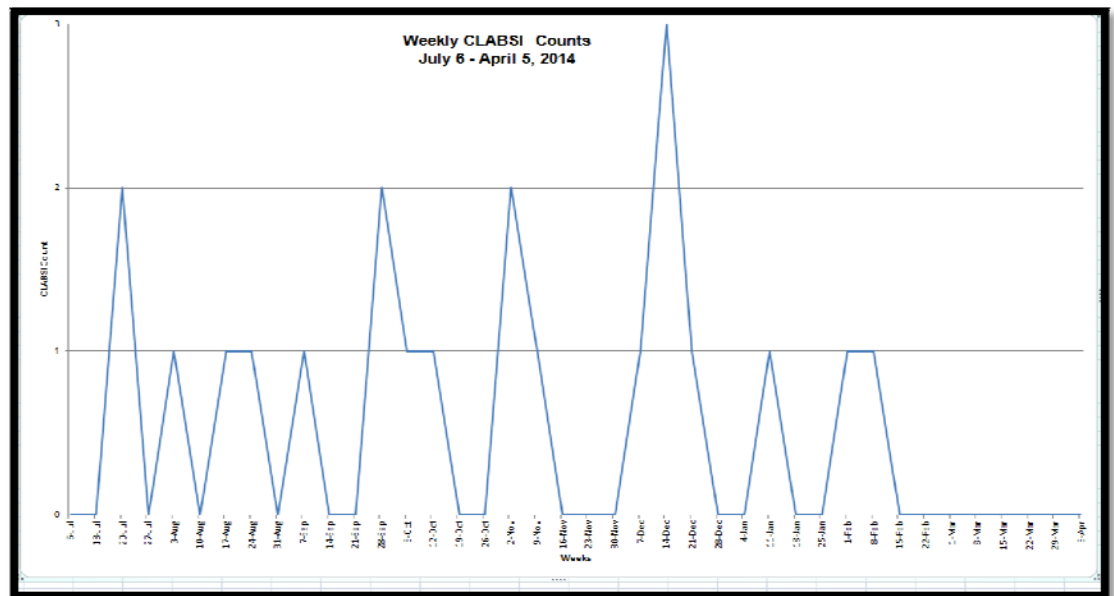

04.09.2014

FROM THE DESK OF:
Anthony P. Weiss, MD, Chief Medical Officer,
Associate Dean for Clinical Affairs,
Upstate University Hospital

UPSTATE
UNIVERSITY HOSPITAL

Catheter Line Associated Bloodstream Infections Applies to Inpatient Physicians

CLABSI Update

At the risk of jinxing the organization, I am proud to say we have now gone eight consecutive weeks without a CLABSI on any unit here at Upstate. This achievement is really a tribute to meticulous care at the bedside, close attention to infection control principals (like hand washing), and careful selection of the use of central lines only when necessary.

Please keep up the good work!

ALERT-Highest priority emergency communication; warrants immediate action or attention by the recipient.

HIGH ADVISORY-High priority does not warrant immediate action but recipients should be aware.

ADVISORY-Provides very important information for a specific incident or situation that does not require immediate action.

UPDATES TO ALERTS AND ADVISORIES-Provides updated information regarding an incident or situation; unlikely to require immediate action.

INFORMATIONAL MESSAGE-Provides timely information, important for review or serves as a reminder for an action that should be taken.
