Medical Safety and You
Acetaminophen with Codeine or Tylenol #3 with Codeine®

New medicine:
Acetaminophen with codeine

Brand names:
Tylenol #3 with codeine®

Use:
- Relief of mild to moderate pain

Potential side effects:
- Lightheaded or dizzy
- Nausea
- Vomiting
- Constipation
- Dry mouth
- Drowsiness

All medicines have the potential to produce effects other than the intended use of the medicine. The chance of experiencing a side effect depends on the medicine, how it is used, what other medicines a person is taking, and individual traits such as age, weight, and other diseases. Some people have no side effects, some mild, some severe.

If you experience any of these side effects, tell your doctor or nurse right away.

Important Information: Administer with food to decrease GI upset, but administration with food is not required.

Please speak up at any time if you have any questions or concerns.
