Potential side effects:
- Flushing
- Headache
- Feeling dizzy
- Irritation where the shot was given

All medicines have the potential to produce effects other than the intended use of the medicine. The chance of experiencing a side effect depends on the medicine, how it is used, what other medicines a person is taking, and individual traits such as age, weight, and other diseases. Some people have no side effects, some mild, some severe.

**If you experience any of these side effects, tell your doctor or nurse right away.**

**Please speak up at any time if you have any questions or concerns.**
