Medicine Safety and You
Clobazam or Onfi®

New medicine:
Clobazam

Brand names:
Onfi®

Use:
- Add-on or sole therapy to stop or improve control of seizures

Potential side effects:
- Irritability
- Sleepiness
- Poor motor control
- Changes in behavior or mental status

All medicines have the potential to produce effects other than the intended use of the medicine. The chance of experiencing a side effect depends on the medicine, how it is used, what other medicines a person is taking, and individual traits such as age, weight, and other diseases. Some people have no side effects, some mild, some severe.

If you experience any of these side effects, tell your doctor or nurse right away.

Important Information: Sleepiness is likely to occur especially when first starting medication and caution should be taken when completing tasks that require mental alertness (ex. driving or operating machinery).

Please speak up at any time if you have any questions or concerns.
