All medicines have the potential to produce effects other than the intended use of the medicine. The chance of experiencing a side effect depends on the medicine, how it is used, what other medicines a person is taking, and individual traits such as age, weight, and other diseases. Some people have no side effects, some mild, some severe.

If you experience any of these side effects tell your doctor or nurse right away.

Important Information: **See how this medication affects you before driving or completing tasks with a quick reaction time. **If you experience the desire to harm yourself, please contact your doctor immediately.

Please speak up at any time if you have any questions or concerns.
