- Mood changes
- Feeling tired or weak

All medicines have the potential to produce effects other than the intended use of the medicine. The chance of experiencing a side effect depends on the medicine, how it is used, what other medicines a person is taking, and individual traits such as age, weight, and other diseases. Some people have no side effects, some mild, some severe.

If you experience any of these side effects tell your doctor or nurse right away.

Important information:
It is important to see how this medication affects you before driving or completing tasks that need you to react quickly. Do not drive or do tasks that could be dangerous if you are not acting as quickly as you need to for safety.

Please speak up at any time if you have any questions or concerns.
