

PROGRAM OBJECTIVES

Upon completion of this educational activity, participants will be able to:

- Identify the names, pharmacological effects and management strategies of the newer drugs of abuse.
- Be able to describe the mechanism and therapeutic treatments for toxins requiring pediatric intensive care.
- Identify the changes and trends in the management of poisoned patients over 25 years.
- Describe common mushrooms resulting in poisoning along with their associated treatments.
- Through High Fidelity patient simulation toxicology cases; be able to apply patient care principles learned in the didactic session. Specifically:
 - be able to identify the cause of the patient's toxicity
 - be able to describe the medical management issues
 - be able to list the toxicology specific considerations and antidotal issues.
- Through an interactive gaming interface; be able to apply factoid principles learned in the didactic session and/or simulation session. Specifically:
 - be able to identify the cause of the patient's toxicity
 - be able to describe the medical management issues
 - be able to list the toxicology specific considerations and antidotal issues.
