Patient care: Rehabilitation Tub Cleaning

Purpose: To ensure all tubs/showers in the Rehab area are cleaned and disinfected daily.

Procedure:

1. Mix quat-stat solution as required by manufacturer's instruction.
2. Wipe sides of tub with cloth saturated in quat-stat solution.
3. Use cream cleaner, and green pad to remove soap scum build up.
4. Rinse entire tub with clean water, using defoamer is used to reduce the amount of foam that is created when the tub is drained.
5. Wipe exterior of tub to remove spots.
6. Wash shower curtain with quat-stat solution. (remove and replace curtain if necessary)
7. Wash faucets with quat-stat solution.
8. Wipe with a clean dry cloth until shiny, free of streaks.
9. Clean equipment and return supplies to proper storage area.
10. Self inspect work.
