Hand and wrist pain has many causes, including injury and disease. Fortunately, many of those causes can be treated and the symptoms eased. Learn about surgical and non-surgical treatments for hand pain, and improve your quality of life.

Meet some of Upstate’s Urology experts and learn about the latest advances in urology. Whether it’s overactive bladder, kidney stones, problems with your prostate, uterine prolapse, or urinary incontinence issues, get information on all of these and more as well as robotic bladder surgery options. This three-part program will highlight what new innovations Upstate offers and give an opportunity to have your urology questions answered.

Light refreshments will be provided.
