

COAP Program

"Children of Adult Patients"
When to consult Child Life Specialist:

WHEN TO CALL

Anytime your patient has children, is followed by the burn team and the following applies:

- Your patient will have prolonged hospitalization
- Your patient has significant burn injuries and their children may need help understanding
- Your patient is at end of life

WHAT I CAN DO

- Help support children while being separated from their caregiver
- Provide age appropriate explanations and information about parents injuries
- Provide legacy and memory making materials for children and families
