

## **Clinical Management in Primary Health Care: AGNP-PC I**

### **6 credits**

This is an entry level clinical course in which the students integrate basic knowledge of human anatomy and physiology and build on advanced health assessment knowledge. The student develops an understanding of the pathologic changes and clinical manifestations that characterize common acute and chronic disorders. Students apply new understanding of pathophysiology, evolving clinical decision-making skills to the interpretation of assessment data, the diagnosis of illness and the treatment of primary care across the lifespan. Students perform complete health assessments and provide client care with supervision. Collaborative strategies guide the student in the implementation and evaluation of accepted advanced practice nursing interventions and integrate research, teaching and consultation skills as a beginning basis for clinical practice.

PREREQUISITES: NURS 607, NURS 621

COREQUISITES: NURS612, NURS565 and NURS640
