

## Clinical Management/AGNP-PC I

5 Credits

This is an entry level clinical course in which the students integrate basic knowledge of human anatomy and physiology and build on advanced health assessment knowledge. Students develop an understanding of the pathologic changes and clinical manifestations that characterize common acute and chronic disorders. Students apply a new understanding of pathophysiology, evolving clinical decision-making skills to interpret assessment data, the diagnosis of illness, and young adulthood treatment through old age. Students perform complete health assessments and provide client care with supervision. Collaborative strategies guide the student in implementing and evaluating accepted advanced practice nursing interventions and integrating research, teaching and consultation skills as a beginning basis for clinical practice.

Pre/corequisites: NURS 612, NURS 565, NURS 607, NURS 616
