

Clinical Management/PNP I

6 Credits

This is an entry level clinical course in which the students integrate basic knowledge of human anatomy and physiology and builds on advanced health assessment knowledge. The student develops an understanding of the pathologic changes and clinical manifestations that characterize common acute disorders. Students apply new understanding of pathophysiology, evolving clinical decision making skills to the interpretation of assessment data, the diagnosis of illness and the treatment of primary care in infants, children, adolescents and young adults populations. Students perform complete health assessments and provide client care with supervision. Collaborative strategies guide the student in the implementation and evaluation of accepted medical and nursing interventions and integrates research, teaching and consultation skills as a beginning basis for clinical practice.

Pre/corequisites: NURS 607, NURS 616.
