

Clinical Management/PNP II

6 Credits

This course reflects a building of knowledge and skills from the previous clinical course. The student continues to progress in the nurse practitioner role and in the delivery of health care to infants, children, adolescents, and young adults with acute and chronic health care needs. Collaboration guides the students in the implementation and the evaluation of accepted medical and nursing interventions used in the care of the child health population. Effective use of skills required for clinical management, education, consultation, referral, and follow-up are emphasized. Therapeutic interventions based upon evidence-based research are integrated along with complimentary and alternative healing approaches appropriate for the child health population. Course work, classroom activities, and clinical assignments enhance the student's critical thinking and decision-making skills, specifically for complex health care problem evaluation.

Pre/corequisites: NURS 686, NURS 640.
