

PROGRAM DESCRIPTION

The intent of this specially designed program is to provide extensive, quality, up-to-date information required for the management of toxicologic problems. This program is intended for physicians, pharmacists, nurses and other health care providers who routinely care for poisoned patients.

PROGRAM OBJECTIVES

1. Appropriately apply indications with respect to identifying a patient suffering from drug induced toxicities due to emerging toxins in 2021.
2. Identify the areas of toxicity with increasing concern in relation to marijuana ingestions or other exposures particularly in children.
3. Identify newer antidotal therapeutic options in the care of the poisoned patients especially with regard to acetaminophen poisoning.
