

PROGRAM DESCRIPTION

This activity is intended for physicians, physician assistants, nurse practitioners, nurses, pharmacists, advanced life support personnel and other health care professionals who may deal with the pediatric emergency patient.

COURSE OBJECTIVES

- Discuss the different types of eating disorders in children
- Identify the various presenting complaints of patients with undiagnosed eating disorders
- Discuss diagnostic assessment for eating disorder patients
- Review the options for management of various stages of eating disorder
- Review trends in local incidence rates for pediatric mental health presentations
- Develop an awareness of mental health levels of care and local mental health resources
- Understand current barriers to care and challenges with the pediatric mental health system

20TH ANNUAL ANNUAL PEDIATRIC EMERGENCY MEDICINE ASSEMBLY

PEDIATRIC EMERGENCY MEDICINE ASSEMBLY

Wednesday, January 25, 2023

Collegian Hotel Syracuse | Syracuse, NY

Presented and Sponsored by the Department of Emergency Medicine
at SUNY Upstate Medical University, Syracuse, NY

UPSTATE
MEDICAL UNIVERSITY

SCHEDULE

- 1:00 - 1:40 **The Dr. Richard Cantor Honorary Lecture**
The Specialty of Pediatric Emergency Medicine: What contributions to the practice of Pediatrics has it made?
Richard Cantor, MD, FAAP, FACEP
- 1:45 - 2:25 **Updates on Eating Disorders in Children**
Asalim Thabet, MD
- 2:30 - 3:10 **A View from the Trenches: Trends and Challenges in Pediatric Mental Health**
Eric MacMaster, MD and Jennifer Rapke, PsyD
- 3:10 - 3:25 Break
- 3:25 - 4:05 **What can we learn from some interesting local cases?**
Phillip Mackewicz, MD
- 4:10 - 5:00 **Taking Action on Gun Violence**
Mitchell McKinnon, MD

Firearms-related deaths are now the number one cause of pediatric mortality in the United States. Though highly politicized, gun violence is ultimately a medical problem, the same as tobacco exposure or vehicle safety. It is our duty to educate ourselves on this critical topic so that we can function as experts in patient care. This talk is focused on how to assess risk and discuss firearms safety with our patients; options when emergent intervention is required; and how to modify upstream factors through advocacy and other strategies.
