EMERGENCY MEDICAL TECHNICIANS SAVE LIVES!

EMTs conduct basic, non-invasive interventions within an Emergency Medical Services system to help save lives. They provide treatment such as:

- Manage Airway with Oxygen, CPAP, Assisted Ventilation & Suction with Adjunct Devices
- Perform Cardiopulmonary Resuscitation (CPR) & Use of Automated External Defibrillation (AED)
- Assist with Childbirth & Neonatal Resuscitation
- Control Bleeding using Tourniquet & Hemostatic Dressing
- Administer Life-saving Medication - Narcan, Albuterol, Epinephrine & Glucose
