

Pediatric (≤ 14 years old) Trauma Cases Requiring Immediate OR Access

The first immediately available operating location, Center for Children's Surgery (CCS) or 5 East (5E), will be utilized as confirmed by the surgeon on record. When the pediatric team is not in-house (after hours) and there is not a room on 3N open, the default location will be 5E.

If case starts in CCS:

Pediatric anesthesia team and nursing team will cover case

If case starts on 5E:

The first available anesthesia team and 5E nursing team will start the case. The pediatric anesthesia team and nursing team will take over if available*.

*Communication between the surgeon on record, anesthesia team, and nursing will determine if a pediatric or adult team is to continue care for the patient.
