Solid Organ Injury (Liver, Spleen)

Assess Vital Signs

Vital Signs Normal
- Admit to floor
- Activity as tolerated
- Regular diet
- CBC on admission and/or 6 hours after injury
- Transfer to floor

Vital Signs Abnormal (after initial volume resuscitation)
- Admit to ICU
- Bedrest until VS normal
- NPO until VS & Hgb stable
- CBC on admission and Q6 hours until VS normal

VS normal
- Hgb stable

VS unstable
- Hgb <7
- Ongoing bleeding

Transfuse blood

Continued bleeding
- VS unstable

Consider MTP
- Angioembolization
- Operative exploration
