Subject: CMO BLAST: Attention - Last Call Physician Education for SICU, MICU, CCU and Burn ICU Providers for Targeted Temperature Management In-Service

Importance: High

Follow Up Flag: Follow up
Due By: Friday, October 22, 2021 3:00 PM
Flag Status: Flagged

We are implementing a new treatment modality for targeted temperature management (TTM). This new modality will offer the opportunity to treat patients through use of intravascular temperature management (IVTM) by way of central venous access.

IVTM requires placement of a specific CVC that is compatible with specific equipment. This treatment is shown to improve neurological outcomes across a variety of disease processes. Additionally, target temperature can be reached faster than surface cooling with better control of temperature variations while minimizing shivering.

The last provider in-service is scheduled today, October 22nd, at 1530 in room 8417 UH. If you provide care in one of these units and have not yet had your training, please go to room 8417 UH at 1530.

Best,

Amy
