Subject: CMO Blast: Studies requiring IV contrast to resume

Importance: High

We are pleased to announce that we will begin to resume outpatient scheduling for CT with contrast and CT IVPs at 50 % of our normal capacity (this equates to scheduling 2 patients per hour) for all locations (Upstate Community, Upstate University, Harrison Center and T5). All locations have sufficient contrast inventory to allow for an increase in scheduling contrast exams. GE has advised imaging facilities to ramp up scheduling, as opposed to complete return to capacity, until such point that inventory is received at regular intervals. We anticipate that all imaging locations will be at full capacity beginning the week of July 5th. Further communication regarding increased scheduling will be sent in the coming weeks. We appreciate your patience as we navigate this national contrast shortage.

Best,
Amy
