#### Description:

The old fashioned divide of public health & the healthcare sector has no role in today's world. In fact, they are not mutually exclusive & are complimentary to each other. Effective sustainable positive changes in health outcomes are possible when these two traditionally divided sectors work collaboratively.

This talk will highlight the intersection of clinical care, society, the role of DSRIP, and primary versus specialist care. The recent Onondaga County Community Health Assessment and Improvement Plan (CHA/CHIP) is a beginning of such collaboration. Special attention will be given to the emerging needs of such crucial understanding among medical students & residents in their day-to-day operation.

This talk is also provided free via webinar! Attend our Grand Rounds from the comfort of your office or home. To register, go to: <https://attendee.gotowebinar.com/register/2497539939470692611> (copy & paste link)
