

EPIC SYSTEM UPDATE

Overview of Feature / Changes

Effective March 19, 2024: COVID-19 testing is no longer required for all patients being admitted based on policy [COVT-08](#). The **Covid-19/Respiratory Orders Panel** has been updated to reflect this change in testing needs.

Previous Order Panel

Presented all ordering options regardless of transmission levels.

COVID-19/Respiratory Ordering

- Select for patients to be admitted
- Select for patients being discharged
- Select for pre-op/procedure clearance
- Select for laboring women
- Select for support person/doula for laboring women
- Select for current inpatients (outbreak testing, known exposure, newly symptomatic)
- Reason for not ordering COVID-19 and/or Influenza testing

New Order Panel

Presents current ordering options for the current community transmission level.

COVID-19/Respiratory Ordering

- Select for symptomatic testing
- Select for patients being discharged
- Select for current inpatients (outbreak testing, known exposure, newly symptomatic)
- Reason for not ordering COVID-19 and/or Influenza testing

Additional Information

Order panel options will change as community transmission levels change in the future.

BPA

The BPA that is generated for Physicians/Clinicians for a patient missing a COVID test will no longer appear.

Policy requires patients are tested for COVID-19 on admission. Place the following order.

Policy requires patients are tested for COVID-19 on admission.

Based on lab results for the current encounter, patient has not been tested. Place the following order.

@LASTFLOWCOVID@
