

EPIC SYSTEM UPDATE

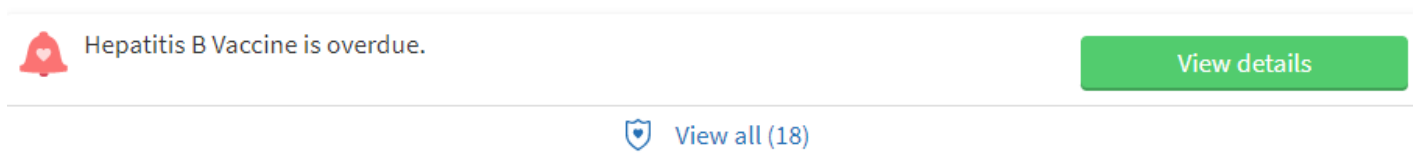

Overview of Feature / Changes

Beginning on Wednesday, October 19, 2022, patients will be able to add whether or not they have received a vaccine via their MyChart account.

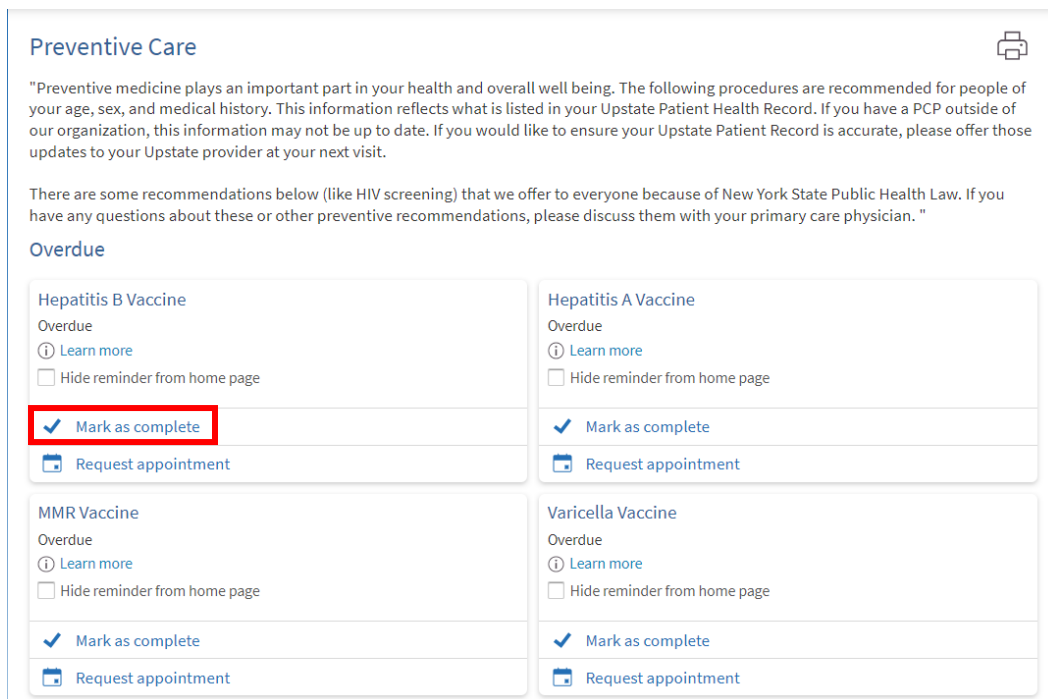

This will be available for all vaccine types. When a patient adds a vaccine via MyChart, this will satisfy their Health Maintenance topic for that immunization, however it will not become a part of Upstate's Local Medical Record until a clinical user reconciles it in Epic.

How It Works

Patients may see cards on their MyChart News Feed that let them know that they have an overdue Health Maintenance topic, such as a vaccine.

By clicking the link on the card or navigating to the **Preventive Care Activity**, patients can view all of these for which they are overdue.

If a patient has had one of these vaccines, they will now be able to denote that using the **Mark as Complete** button and entering the date on which they received it.

Continued...

Once a patient submits an immunization, it can be reconciled via the **Reconcile Outside Information Activity** in Epic. This can be accessed via banners in activities like the **SnapShot** or **Immunizations** or by doing a Chart Search for **Reconcile Outside Information**.

The screenshot displays the 'Immunizations - All Types' interface. At the top, there is a navigation bar with 'All Admin Types', 'Historical Admins', 'Immunization Request', 'Query Immun Registry', and 'Refresh'. Below this, a prominent orange banner states 'Immunizations from outside sources need attention' with a 'Go Reconcile' button. The main content area is divided into sections: 'Administration History' (with filters for 'Vaccine', 'Admin Dates', and 'Next Due'), 'Medications' (with a 'Prior Authorizations' link), and 'Immunizations/Injections'. The 'Medications' section features an orange banner: 'Medications from outside sources need reconciliation.' Below it, the text 'None' is displayed. The 'Immunizations/Injections' section also has an orange banner: 'Immunizations from outside sources need reconciliation.' Below this banner, a list of immunizations is shown: 'Influenza Quad IM Pres Free (0.5 mL dose) 9/29/2021', 'Influenza Whole 7/11/2022', 'Moderna SARS-CoV-2 Vaccine 12/24/2020', and 'Pfizer SARS-CoV-2 Vaccine (Purple Cap) 1/12/2021'.

Once the immunization is reconciled, any necessary information can be updated via the **Immunizations Activity**.
