COLLEGE OF MEDICINE

EXCEPTIONAL MOMENTS

IN TEACHING

Rebecca Greenblatt, PhD, is assistant professor of Microbiology and Immunology at SUNY Upstate Medical University. She is the **March 2021** Recipient of the **Exceptional Moments in Teaching Recognition**.

COMMENTS FROM DR. GREENBLATT'S STUDENTS:

"I love Dr. Greenblatt's extremely clear and concise teaching style. She always focuses on clinical relevance, which I appreciate. I enjoyed going to her live lectures because she's so enthusiastic and engaging. I also appreciate the Poll Everywhere questions to keep students involved, which is both difficult to do and so important with remote learning."

"Dr. Greenblatt always came to class with energy and excitement for the material."

"Dr. Greenblatt is incredibly quick-witted, and always inserts jokes into her presentations, which helps keep students engaged. She presents the core material and also provides additional interesting details for those who are curious."

"Very clear presentation, and her lectures are always super well organized. It is like she is telling a story with the presentation which always helps me remember things better personally."

"I appreciate Dr. Greenblatt's enthusiasm and incorporation of humor into lectures. Although I often watched these lectures from home, these traits still kept me engaged."

The College of Medicine recognizes exceptional teachers with the monthly "Exceptional Moments in Teaching" program. Honorees are selected via student assessments from courses and clerkships. Recognized teachers—including medical faculty, residents, nurses and other educators—are those who challenge students and provide an exceptional learning experience.
