

3/25/2020 – Important update on clinical rotations

Hello students,

Upstate leadership (including President Dewan and deans from all the colleges) met today and extended the suspension of all student clinical rotations (and research lab-based engagement) from 3/31 to 4/15, for Upstate students (in all colleges) and any visiting students. They will revisit this regularly.

Students should have no patient contact and no in-person educational activities. Non-clinical, non-lab coursework will continue via remote learning, to sustain physical distancing. Note – students should practice social distancing off campus as well.

Phase 1 and 2 faculty and administration will discuss the implications of this extension and send out class-specific updates tomorrow.

Dr. Lesperance
