

Electives from the Upstate Course Selection Book that have **potential** to be done remotely without patient contact or presence on campus. There may be other electives in the course catalog that would be options as well. Please keep in mind that at this time students are not allowed patient contact. Some of these electives require completion of at least some clerkships prior to taking the elective.

Students are encouraged to reach out to the specialty you are interested in to see if there is a project that can be pursued as a unique elective such as: research, case reports, chart review research etc. No retroactive credit can be given for unique electives.

Students will need to check with the elective course director prior to adding to schedule if the desired electives can be completed remotely.
