

5/11/2020 – Information AAMC Timeline for Residency Applications

Dear class of 2021,

We are happy to report that the AAMC has announced a new timeline for residency application this year, including October 21 as the date that programs can begin reviewing applications (previously September 15). The match dates remain the same and have not been delayed. This change gives students an additional 5 weeks of time to get things ready for residency application.

<https://students-residents.aamc.org/applying-residency/article/eras-timeline-md-residency/>

We are still planning for a May 26 return to clinical rotations for rising 4th year students (elective block 1). We have been told that conditions look favorable for this to happen, but there has not been an official announcement yet. We hope to have official word from the Upstate Recovery Team later this week.

Stay well everyone,

Dr. Mason

Dr. Lesperance
